Developing Local Capacity

A primary goal of NASP’s PREPaRE School Crisis Prevention and Intervention Training Curriculum (PREPaRE) is to build school crisis management capacity at the local level by establishing a common crisis prevention and intervention framework. PREPaRE is the first comprehensive crisis prevention and intervention curriculum developed by and for school-based professionals who have had direct experience in preparing for and responding to school crises. PREPaRE consists of two core workshops and two corresponding training of trainer (ToT) workshops, which can be taken together or independently of each other. School districts can either sponsor workshops for entire teams and/or all relevant staff on site or send team members to local, state, or national level trainings. Below is an overview of PREPaRE trainings that have been conducted nationally and internationally since the curriculum’s inception in 2006. Please note this list changes frequently as trainings are conducted. This summary also accompanies the PREPaRE Overview and PREPaRE Program Evaluation Summary documents.
