

# Student to School Psychologist Ratio 2021–2022

## Based on the US Department of Education Common Core of Data

The data used in the calculation of ratios were provided to the US Department of Education by state departments of education. These data are provisional and we are aware that these numbers may not align with other sources of data. NASP will be monitoring these data and will update this graphic should new information become available.

The National Association of School Psychologists recommends a ratio of 500:1.

Data as of 1/10/2023.

All data are from U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Public Elementary/Secondary Education Survey," 2021–2022 V.1a.

\* Data for 2021-2022 are unavailable for Nevada and ratios were imputed from 2020-2021 data. No data are provided for American Samoa. Ratios for Alabama, Mississippi, and New Mexico, were greater than 7,500 students per school psychologist.
