

Adding an Attachment when Posting a Message in a Community

Step 1: After you have drafted your message (see the how-to titled, “Posting a Message in a Community,”) click the green “Attach” button to add an attachment to your message.

Step 2: Drag in or upload a file from your computer, then click the blue “Upload” button.

Step 3: You will now see your attachment displayed underneath your message’s text field. Click the blue “Send” button to finish. If you are posting to a moderated community, your message will be reviewed and approved, and will not appear instantaneously.
