# Replying to a Post in the Communities (Online)

Step 1: If you'd like to reply to a discussion you see while on the NASP Communities website, click the hyperlinked discussion title from the list of discussions in the "Discussion" tab of the community.

Step 2: If you'd like to reply to the discussion, making your answer visible to the entire community as a part of the discussion thread, click the blue "Reply to Discussion" button and follow the instructions for posting a message (see the how-to titled, "Posting a Message in a Community".)

To see additional options, click the arrow next to the "Reply to Discussion" button. These options include "Reply to Sender," which will send a private message to the author of the post.
